NewBLAST™

Water Blast Pipe Cleaning Systems
10,000—20,000 Psi (690—1380 bar)

The NewBLAST™ Water Blast Pipe Cleaning Systems

- Designed to clean tubing, casing, drill pipe, and rods including removal of rust, scale, oil based muds, drilling cement and etc.
- Pipe size capacity: 2” to 24”.
- Two free-standing rotating modules that spin the pipe in place, variable speed with hydraulic motors. Raises and lowers with hydraulic cylinders. All functions remotely controlled by operator.
- Pipe positioning v-rollers with hydraulic motor drive. Raise and lower and lifts the pipe, moving it back or forward for proper end positioning.
- Overhead gantry with traveling trolley with water blasting nozzle to clean pipe O.D. Remotely controlled by operator.
- Internal lance powered by variable speed electric motor and rollers. Includes rotating nozzles and centralizing device. Remotely controlled.
- Heavy duty triplex pump driven by electric motor (international voltages available) mounted on heavy 6” steel channel skid protected oil level sight glass, quarter turn ball valve oil drain.
- Production Speed: 5 to 30ft / 1.6 to 9.6m per minute, per pass. (Depending on pipe size, length and condition)
- Cleaning Coverage: 100% of ID & OD surface with correct nozzles and rotating speed.
- Available in stationary or portable models.

Triplex Pump on Skid
